Effectiveness, Satisfaction, and Retention: The Impact of Learning Environment Design on Educators

October 4, 2023 | 4:00 PM | online

The Simulation:

So much of our focus in learning space design tends to prioritize the learner. Often students are at the center of decisions made about new buildings, renovated spaces, and how to use existing furniture and other resources effectively. But while having these conversations, we can't forget about another key element of learning space design: how it affects educators.

Teachers are our most important resource in schools, but they can grow inefficient and ineffective without the right tools. In addition to school climate measures, professional development, and holistic health support, educators need access to spaces that support their performance and enhance modern learning.

Takeaways:

In this webinar, Dr. Robert Dillon will discuss how designing for educators can help support learners.

Join us to learn more about:

- The **impacts of your learning spaces** on both educators and learners
- Creating a plan to provide teachers with the best possible surroundings to showcase their craft
- How environment can **improve job satisfaction and teacher retention** in your school

Facilitator Dr. Robert Dillon:

Dr. Robert Dillon is an author, speaker, educator, and lifelong learner. His twenty plus years in education has seen him serve kids and families as a teacher, principal, technology director, and innovation leader. His primary focus is working to bring synergy to instructional design, technology infusion, and learning space design. He believes that in this synergy is the educational gold that students need to be successful citizens in a modern world. He works through an equity lens and looks to bring excellence to every classroom. Dr. Dillon supports schools and districts around the country in optimizing their learning spaces for greater educational impact.
